SYAUQI DHIYA ULHAQ

Bandung, Indonesia | +62 877-8889-0319 | syauqi.d.u@gmail.com | linkedin.com/in/syauqidhiyaulhaq

PROFESSIONAL SUMMARY

Software Engineering with experience in Software Quality Assurance, UI/UX Design, and software development. Experienced in functional software testing, test case design, UI/UX prototyping, and web application development through academic, laboratory, internship, and capstone projects. Particularly interested in Software Quality Assurance and building reliable, user-centered software products.

EDUCATION

Telkom University Bandung, Indonesia

Bachelor of Software Engineering (S.Si.Kom), GPA: 3.90 / 4.00 2022 – 2026

EXPERIENCE

PT Kereta Api Indonesia (Persero) Jul 2025 – Sep 2025

UI/UX Designer (Intern)

- Contributed to the redesign of KAI's corporate profile website to improve information accessibility and overall user experience.
- Developed UI/UX design solutions and interactive prototypes based on identified user and business needs.

Informatics Laboratory, Telkom University Sep 2024 – Jun 2026

Teaching & Practicum Assistant

- Assisted teaching and practical sessions across Software Testing, Software Analysis & Design, Object-Oriented Programming, Software Construction, Web Programming, and Mobile Programming courses.
- Guided students in software engineering concepts, assignments, practical exercises, and software testing activities.

Advanced Software Engineering Laboratory, Telkom University Juli 2024 – 20266

UI/UX Intern & QA Mentor

- Contributed to team-based UI/UX projects covering requirement gathering, interface design, and interactive prototyping.
- Mentored students in software quality assurance concepts and software testing practices.

PROJECTS

Donor Management System of Amanah Ummah Foundation Capstone Project

QA Engineer

- Designed and executed functional test cases using black-box testing techniques including Equivalence Partitioning, Boundary Value Analysis, and Decision Table Testing.
- Conducted manual and automated functional testing and documented testing results to support software quality validation.

Aksara Ulu Software Testing Project Testing Project

QA Engineer

- Develop requirement-based test cases and perform functional testing as part of an independent software testing team.
- Document test results, defects, and supporting test evidence for the evaluated system.

BizGrow, UMKM Demand Forecasting & Inventory Platform Capstone Project

Full Stack Developer & QA Engineer

- Contributed to the development of a web platform for managing sales, inventory, and product demand forecasting for SMEs.
- Worked across application development and software testing activities using Laravel and relational databases.

Starbucks Mobile Application Redesign Competition Project

UI/UX Designer

- Collaborated on a redesign concept focused on improving customer experience through clearer nutritional information and chatbot-assisted interaction.
- Awarded 3rd Place in Digi X National Business Plan & UI/UX Case Competition 2023.

HONORS & AWARDS

3rd Place, Digi X National Business Plan & UI/UX Case Competition 2023

HIMA Bisnis Digital, Universitas Padjadjaran

TECHNICAL SKILLS

- **Software Testing:** Manual Testing, Automation Testing, Black-Box Testing, UAT, Katalon Studio
- **UI/UX:** Requirement Engineering, Figma, Wireframing, Prototyping, Usability Testing
- **Programming**: JavaScript, PHP, Java, Dart
- **Frameworks & Platforms:** Laravel, Express.js, Next.js, Flutter, Firebase
- **Database**: MySQL, PostgreSQL
- **Tools:** Git, GitHub
